Faculty/Staff Seasonal Influenza Campus Clinic Canceled

10/14/09

The faculty and staff seasonal influenza vaccine clinic scheduled for Oct. 21 has been canceled. It will be rescheduled for sometime in November. Western Wisconsin Medical Associates has not yet received their additional seasonal influenza vaccine supply, as is currently the case with many providers. Seasonal influenza vaccines are still available at many locations, and for those providers who are currently out, check back in the next few weeks, as they may receive additional supplies. Faculty and staff can check with their health insurance plans and providers regarding coverage and availability. As of today, Shopko in River Falls (715/425-6272; \$30) and Pierce County Public Health Department (715/273-6755; \$30) currently have seasonal influenza vaccines. Maxim Health Services also offers area seasonal influenza vaccine clinics (approximately \$30; <http://www.findaflushot.com/>). They are still listing seasonal flu shots at Saint Bridget's Catholic Church in River Falls (536 North Main St., 715/425-5983) from 2 to 4 p.m. on Oct. 21. Plans to distribute H1N1 vaccines are underway. For more information about seasonal and H1N1 influenza and vaccination, visit the UWRF Emergency Preparedness H1N1 Web site at <http://www.uwrf.edu/emergency/flu.html>. For questions, call Student Health Services at ext. 3293.
